

Are Your Historical Paper Dental Charts Safe From Fire, Theft & Loss, or Just Taking Up Valuable Space?

Highly Efficient Dental Chart Scanning Services

Micro Com Systems Ltd. has been providing document imaging services for over 45 years. We're BC's leading document imaging company.

Our scanning service bureau digitizes well over a million pages per month on behalf of our many clients. Let us convert your existing patient records in a fraction of the time it would take you.

We can also leverage current patient data to increase scanning automation, reduce data entry costs and virtually eliminate patient demographic data errors.

How Does it Work?

Either we can scan your dental charts at our secure facility, or we can transport our team and equipment to your office.

Micro Com Systems Ltd is willing to sign a confidentiality agreement to allow for the transfer of patient data.

Why Scan Your Paper Dental Patient Charts to Digital files?

- **Dental Practice Management Software (DPMS) Compatible** - Store all of your historical charts as PDF attachments to the patient's file in your **DPM system**. We have the ability to import the data to most DPM systems.
- **Standalone System** - If you don't have an EMR, your files can be stored on **encrypted and password protected** electronic media. MCS can provide simple and inexpensive solutions to access your files.
- **Disaster Recovery** - Once your paper patient charts are digitized, the data can be stored on your office systems plus **backed up off-site** to protect them from fire, theft, deterioration, misfiling or loss.
- **Worldwide Retrieval** - Once in a digital format, patient files can be safely **retrieved on-line instantly from anywhere**. Eliminates the need to carry around paper charts.
